

AllClear Fuel Flow Transmitter for KC-10 and KC-135 Aircraft

The Fuel Flow Transmitter functions as the primary source of accurate fuel flow measurement during KC-135 and KC-10 in-flight refueling activities.

KC-135 refuels an F-15

KC-10 refuels a joint-flight of F-15s and F-16s

Fuel Flow Transmitter

Universal Fuel Flow Test Stand

- » Max 12,000 RPM
- » Capacity 2,000 Gallons

Cutaway of Fuel Flow Transmitter

ALLCLEAR FUEL FLOW TRANSMITTER

Aircraft	Nomenclature	Part Number	NSN
KC-135	Fuel Flow Transmitter	8TJ53GAA2	6680-00-585-5309
KC-10	Fuel Flow Transmitter	8TJ53GAD2	6680-01-411-9169

Product Offering Highlights

- » Accurately measures the flow of fuel from KC-10/KC-135 aerial refueling aircraft
- » High-reliability
- » Corrosion resistant metal alloys
- » AllClear sole-source supplier
- » Manufactured per OEM specifications
- » Maintains KC-10/KC-135 fleet operational status until aircraft retirement
- » In-house repair, testing, and manufacturing capabilities
- » Pricing and delivery available on request
