

TAVCO PRESSURE VESSELS AND VALVES SERVICE NOTIFICATION LETTER

EFFECTIVE IMMEDIATELY

JUNE 9, 2021

The purpose of this letter is to advise you of a new practice that TAVCO will be implementing immediately for all products designed and manufactured by TAVCO, that include a flight critical pressure vessel as a component, whose failure or malfunction, may result in loss or serious damage to an aircraft and present unsafe conditions. This practice will apply to both new and overhauled products.

TAVCO will be affixing a decal, in addition to the system identifying nameplate, at an appropriate location on the pressure vessel that states when the system is recommended to be returned to TAVCO for overhaul. **That date will be three (3) years from the date of shipment from TAVCO.**

The purpose of the decal is to assist in ensuring that the pressure vessel be examined by TAVCO at regular three-year intervals to ensure its airworthiness through its service life. This is accomplished through a series of non-destructive tests including proof, magnetic particle, x-ray, and a thorough visual and physical examination of the exterior and interior finishes and any required mechanical inspection. Any associated TAVCO valves will also be overhauled (visual examination, all O-rings replaced and tested).

Please note that TAVCO is the OEM and is the only authorized repair station to perform maintenance on its products.

Since 1950, TAVCO has served the aerospace industry by delivering the highest quality products. We value your business and look forward to providing you with exceptional quality and service for decades to come.

For any questions or comments, please do not hesitate to contact us at (818) 855-5819 Option 0 or online at rfq.tavco@goallclear.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Anthony Grant'.
